DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to cyclodextrin derivatives and compositions thereof, classified in class 536, subclass 103.
- II. Claims 15-19, drawn to sulfonate derivatives of dihydroxybutane, classified in class 562, subclass 30+.
- III. Claim 20 drawn to derivatized polysaccharides, classified in class 536, subclass 56+ (for exemplified cellulose).
- IV. Claim 21, drawn to alkypolyglycosides, classified in class 536, subclass 4.1+.
- V. Claim 22, drawn to a method of chiral chromatography using derivatized cyclodextrins, classified in class 210, subclass 656+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case derivatized cyclodextrins could be used as a vehicle for drug delivery. This use of cyclodextrins is well-known in the art.

Inventions I, II, III and IV are unrelated to one another. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 1623

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case group I is disclosed as being useful for forming inclusion complexes. Group II is disclosed as being useful as monomers for the preparation of polyesters. Groups III has no disclosed utility. Groups IV has utility as a surfactant. There is no disclosure that the different inventions are capable of being used together. Furthermore, these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
